“Bringing harmony to the face results in a balanced appearance; the nose should not distract attention from the intrigue of the eyes and the beauty of the lips.”

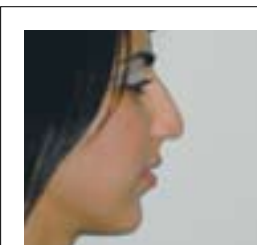

—SHERVIN NADERI, MD, FACS

Dr. Naderi's attention to detail and artistic sense is visible as soon as you step inside his office. “Almost every person who walks through the door says our office looks and feels more like an inviting, modern home than a doctor's office,” says Dr. Naderi. With an intimate practice and an exclusive specialization in nasal surgery, Dr. Naderi is able to focus on his patients' surgical goals, aesthetic desires and facial proportions to truly give them a beautiful nose that fits. “I enjoy focusing on one small part of the body as opposed to being a jack of all trades, because a more focused scope gives me a sense of comfort knowing that I am providing the best possible care for my patients,” he explains.

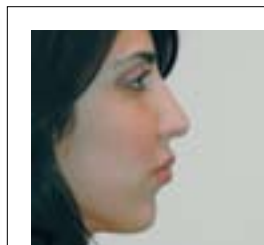

With a total hands-on approach to his own practice, Dr. Naderi is involved every step of the way—from designing and decorating his own office, to getting to know his patients on a personal level. Each patient is much more than just a chart or a nose. Dr. Naderi personally spends up to an hour and a half on the initial consultation, getting to know each patient and their respective goals. To further enhance the communication process, Dr. Naderi uses computer imaging to give his patients a view of the nose that best fits their face, with plenty of options or versions, so they can see the difference one or two millimeters can make. “It's not just what the nose should look like; it's what the nose can look like,” says Dr. Naderi. “It's important to me that as the surgeon, I perform all of the imaging rather than a photographer, making sure what I show on the computer screen is surgically plausible.” His office also caters to out-of-town patients who fly in just for the procedure. With a well-versed office dedicated to concierge service at every turn, his attentive staff caters to and satisfies every patient's individual needs, from hotel arrangements to transportation and everything in between.

A DELICATE BALANCE

BEFORE

AFTER

Dr. Naderi's approach to rhinoplasty is encompassed by simplicity and elegance. “A nose can be **BEAUTIFUL** and still look **NATURAL**. These should not be conflicting goals.” As an **ARTISAN OF THE NOSE**, Dr. Naderi believes honest pre-op dialogue and meticulous surgical technique lead to happy patients and extremely low revision rates. “What puts a smile on my face is seeing the smile on a grateful patient after the splint is removed, knowing they made the right decision.”
